LNSP PROCESSING TIMELINES 2025

1. LNSP Case Processing Timelines:

a. Once the individual's case is submitted to SSO, we action them by order of receipt; generally, within 1 business day.

b. Once the background check is free of errors, the G2 LNSP team forwards the case to BfV so they can conduct the required the multi-faceted investigation.

c. Average length of investigation for "Completed" results:

- 1 week – 8 weeks for 85% of cases
- 9 weeks – 52 weeks for 10% of cases
- 1 year for 5% of cases

d. Average length of investigation for "See Security Manager" results:

- 4 months – 8 months for 70% of cases
- 8 months – 11 months for 25% of cases
- 12 months - for 5% of cases

2. General Information:

a. For any cases processing for over a year from the "Modified On" date, the case will be manually rejected by G2 LNSP managers. *If a LNSP check is still required for the individual, a new case with updated documents will need to be submitted.*

b. "Completed" background checks based off incorrect PII (wrong date of birth, name misspelled) *"invalidates"* the background check results; this means a new background check is required.

c. Once a case status reflects as "Processing" in the LNSP Online System, the USAREUR-AF LNSP Team **cannot "influence" or "expedite" the background check to receive results.** The LNSP account holders see the same processing status as the USAREUR-AF G2 LNSP Managers.

d. Processing timelines vary per applicant based on the unique background checks required, response delays from external agencies (which often require follow-ups), or pending legal decisions awaiting final judgment.

e. For questions please contact the G2 LNSP Team at usarmy.wiesbaden.usareur.list.g2-isd-sso-lnsp@army.mil
